

Teen Solutions Boy's Mentoring Program

Becoming a Man

All young men, regardless of their economic background or academic performance, share the same concerns about becoming an adult. Many don't have the skills and confidence they need to succeed, putting them at risk for anger, apathy, addictions and depression.

Synthesizing brain science, adolescent biology and attachment psychology, Richard has a comprehensive understanding of what motivates your son. He's an expert at developing an individually tailored program for your son that produces results and change.

Parents can learn how to:

- Clarify and instill your values.
- Proactively motivate your son.
- Support his genius and creativity.
- Create enforceable boundaries.
- Handle tough issues like drugs, sex, homework, disrespect, etc.

Program Elements:

Individual Mentoring & Therapy - Guiding your son to change his beliefs and behaviors

Parent Coaching & Consulting - Learn to connect with your son and help him mature

Teen Boy's Mentoring Team - Positive group influence to socialize your son

Mom's Support Group - Learn when to step back so your son will step up

Men's Team for Fathers - Learn to be an inspiring model for your son

Family Constellations - Access the power of your ancestors to heal your family

Richard's philosophy on raising teen boys - *Young men used to be celebrated members of society with purpose and honor. They were challenged, trained and initiated into manhood so they could serve and protect their communities. Without direction and a rite of passage they are lost and don't know who they are. They need a village of love and boundaries provided by their parents, mentors and healthy peers to put them back on track.*
